

Women in Engineering: Paths to Success

Presented in Partnership by Brose
and the Square One Education Network

February 25, 2021 ~ 3:30-4:30pm EST

Women in Engineering: Paths to Success

Presented in Partnership by Brose
and the Square One Education Network

February 25, 2021 ~ 3:30-4:30pm EST

This is a **special event** for young women in 6th-12th grades or college/university as well as 6-12th grade educators! We have an amazing line up of panelists to inspire girls toward STEM careers! Students in attendance will be eligible for door prizes!

[Register Here](#)

Sara Wong Hilton will moderate our panel discussion! She is the Industrial Engineering Manager for [Brose North America](#), leading a team of Industrial Engineers in 10 plants across North America. Sara is a Detroit native, a graduate of Renaissance High School, Georgetown University, and

University of Michigan-Dearborn for her M.B.A. in International Finance.

Rhonda Clarke received a Bachelor of Science in Industrial Engineering from Kettering University. As a freshman in college, Rhonda started working at [Brose North America](#). She continued on after graduating in 2016 and currently works as an Industrial Engineer.

Dr. Gladys Anyenya joined [Bosch](#) as a Fuel Cell Development Engineer in 2018 and was a resident engineer at Nikola Motors where she worked on testing, commissioning and calibration of the Fuel Cell and Hydrogen storage systems on the Nikola Alpha trucks.

Victoria Schein, Research Engineer, Innovator, and Designer at [Ford Motor Company](#). She holds multiple patents around mobility solutions. Victoria studied engineering and studio art at Smith College in Massachusetts.

Alicia Brown is a Senior Industrial Engineering student from [Kettering University](#) in Flint, MI. She began at Nexteer Automotive and served as an Industrial Engineering intern for The Walt Disney Company at their Disneyland Theme Park!

We hope you'll join us for this hourlong conversation with amazing women in engineering...learn keys to launching your own successful college and career pathway in engineering, and the life of today's female engineers!
