

Mexico

By Abigail Maldonado-Garza

I like to go to Mexico because you can have lots of fun over there. In the summer you can go to Mexico and stay there for as long as you want because there is no school. The summer is very hot over there so you can play inside a pool. Most of the time, I go to Mexico during the winter because they also celebrate Christmas and it is fun seeing all the colorful lights all around the house. I also like to go to Mexico because I have family members that live over there and it is great to pass the holidays with them. I love the food cooked in Mexico because it is so yummy, and I wish I could eat it every day, but I can't because my mom says that my stomach will hurt. My favorite food in Mexico is: tacos, mole, arroz, hot chocolate and la torta. What I also like about Mexico is that their sunsets are very beautiful and that at night it gets warm inside the house so I can sleep well. I play most of the time with my cousins and it is fun. My favorite part of every holiday party is the candy, it is so good I can't stop eating it. I wish that I could live in Mexico, but I can't because I also have a lot of fun here in Michigan. Where is your favorite part to go?
