

Weekly COVID-19 Saliva Testing for Students

As an additional measure of monitoring and preventing the spread of COVID-19, we are offering weekly, saliva-based PCR testing for students at our school. This will help identify people who may have the virus without symptoms. Your student may be tested with your consent. (If your student cannot do saliva testing, we can arrange for nasal testing with your consent.)

Collection will happen at the school site during the school day.
You must provide consent for your child to be tested.
Results are sent to your cell phone in 1-2 days.

To register please visit <https://lynxdx.health/dpscd>

How it Works

Register with LynxDx on the web

Provide saliva sample (no swabs)

LynxDx transports sample to CLIA lab

Lab runs test with high-accuracy PCR method

Result sent via email and text in 1 calendar day

Students should avoid eating or drinking anything other than water within 30 minutes testing. Make sure your student is hydrated.
