

SWA's 2021 March Madness Mathematics Bee

On March 23, 2021, our school held its first ever online Math Bee! Our March Madness Mathematics Bee competition was a blast! There were two divisions. The bright scholars of 1st and 2nd grade made up the lower elementary bracket, while brave scholars from grades 3-6 made up the upper elementary bracket.

First, each classroom from grades 1-5 held a class Math Bee. Each classroom then sent their 1st and 2nd place winners to compete in the school-wide Math Bee. The Math Bee was held online so virtual students could also participate. F2F students brought their computers to Room 117 to connect online, the big screen was shared, and the competitions were on! Everyone's tummy was full of butterflies. Each division went several rounds before winners emerged. In both divisions the girls refused to be crushed! Everyone did an amazing job!

Congratulations to our winners of the 2021 SWA March Madness Mathematics Bee!

Special thanks go out to our super supportive Principal, Ms. K. Craig and all of SWA's marvelous Staff for their interest and support; our loving Parents and families; our exciting math bee Host Ms. R. Fisher; our enthusiastic Time-Keeper Mr. Fells; all of the amazing Competitors; and the ardent Judge Ms. W. Darty.

Thanks so very much to all of you!

1st - 2nd Gr. Winners – Bright Scholars

1st - Melody Gunn
