We are on a Journey!

Reform doesn't happen once. Reform is a process.

Where we are and where we're going with our facilities investments.

2018-2020

Facilities Assessment and Community Engagement: Understanding Our Need

2020

Initial Anchor Investments: Building Our Foundation

2021-2022

The Facility Master Plan: Setting a Path Forward

The Future

Future Investments: Fully Realizing Our Vision

The District conducted a facility assessment which identified \$1.5B in facility needs by 2023.

In 2019, the District reactivated schools Barton, Edmonson, Hamilton and Academy of Americas at Logan to address facility needs and enrollment changes. Through additional community engagement, the District reactivated White, moved CMA to Ludington, moved Pulaski, shifted King to an exam school, and made investments totaling \$8.5M.

Through our Fund Balance and the creation of a Capital Fund, we have **committed to over \$132M in anchor investments** to make the first set of improvements to our facilities.

With the federal relief funds available to the District, we are now able to set a path forward to address many, but not all, of our needs.

With continued rising costs, our Facility Master Plan proposes the **most immediate investment needs totaling \$700M out of a \$2.1 billion need.**

We know that the work does not stop here. We know that there are **more than \$1.4B in investments** we need to make to fully realize our vision.

What the Facility Master Plan seeks to accomplish...

Provide a 20-year facilities vision and plan within the constraints of funding. We have a ~\$2.1 billion need with ~\$700 million of one-time funding. This Plan identifies recommendations for full ~\$2.1 billion in long-term investments and immediate work for ~\$700 million.

Protect neighborhood schools and feeder patterns; placing students in the best school building as possible with the review of Facility Condition Index, enrollment, local demographic studies, and school building utilization.

Continue to maximize use of our school buildings (students v. seats), improve overall condition of schools through some new school buildings and renovations focused on HVAC, roofs, and masonry.

Invest in early education to provide feeder patterns into K-12 schools.

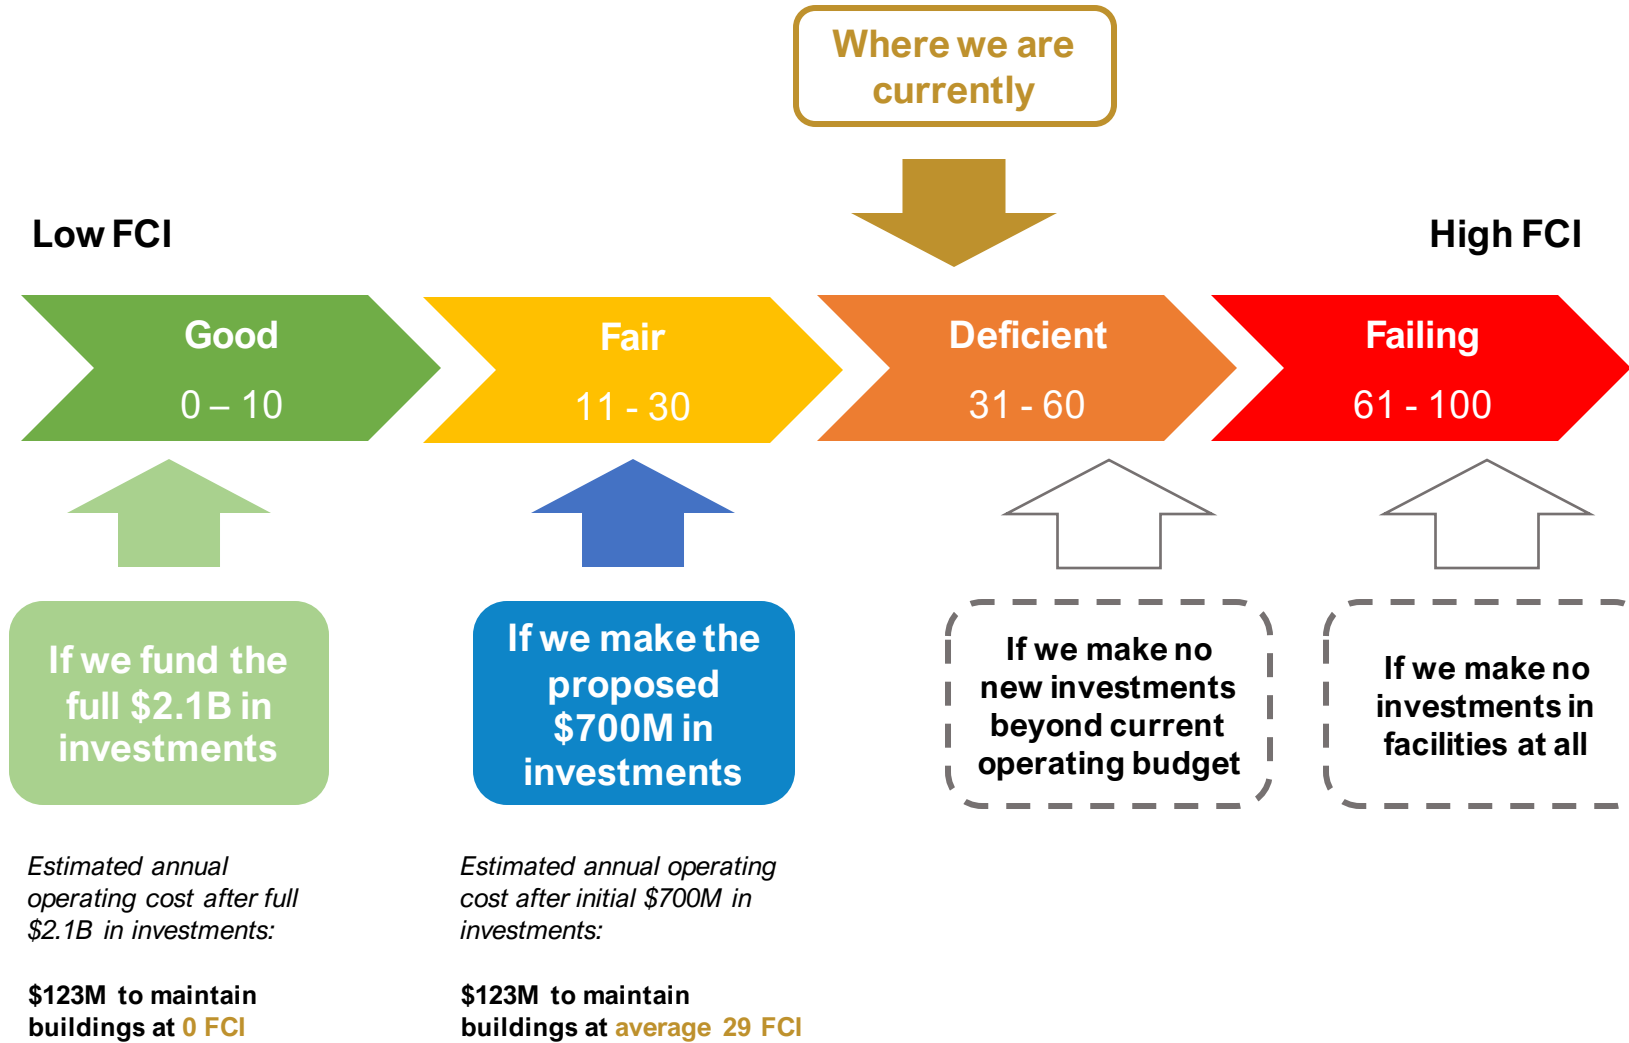

The proposed \$700M in initial investments under the Facility Master Plan will set a solid foundation for future investments and full implementation of the vision. However, we know that even after making these initial investments, there will be an ongoing need to maintain our facilities.

Under the current proposal, the operating cost to maintain our buildings would be **\$123M per year**. This is based on an industry standard of annual operating costs of 4% of a building’s Replacement Value.

This is why ongoing advocacy is critical to ensure DPSCD receives the necessary funds for facility maintenance and improvements.

INITIAL INVESTMENT

Facility Master Plan Vision Statement

“Our vision is to implement a plan that supports schools and neighborhoods, creating opportunities for children and families, create physical spaces that equip students and educators for success, and healthy, safe and sustainable facility design, financing and operations...”

General Discussion

Community Discussion Q1

What is important about the existing school culture that needs to be preserved, celebrated, and highlighted in some way in the new building?

Community Discussion Q2

What are the key values, goals, and or special history you believe the new school should embody?

Community Discussion Q3

What are current challenges of the existing building and or site?

Exterior Discussion

Community Discussion Q4

What are the expectations for the aesthetic and architectural style of the new school?

Community Discussion Q5

Are there any security or safety considerations that should be taken into account for the new building?

Interior Discussion

Community Discussion Q6

What specific educational needs or features would you like to see incorporated into the new school?

Community Discussion Q7

How can the design foster a safe and secure learning environment for students, staff, and visitors?

Site Discussion

Community Discussion Q8

What are the concerns regarding noise, traffic, or other potential impacts on the neighborhood?

Community Discussion Q9

How can the school design promote sustainability and environmental consciousness?

Community Discussion Q10

How do we design to include community engagement and involvement after school hours?
